CHAPTER 1

HPV infections and potential outcomes

HPV: What it is, where it is and what it causes

1. What does HPV mean? 48
2. Is it a single virus? 48
3. What does HPV cause? 49
4. Where do we find HPV? 49
5. On what areas of the human body does HPV live
and multiply? 49
6. What are papillomas and what are condylomas? 51

HPV: Not all types of HPV are the same. Which ones may lead to cancer?

7. Genital types of HPV: What areas do they infect
and what do they cause? 52
8. Genital types of HPV: Is the specific type important?
Are they all dangerous? 54
9. Low-risk types of HPV: what do they cause? 54
10. High-risk types of HPV: what do they cause? 55

What can happen to you after the infection?

11. How does HPV multiply in your cells? 57
12. If infected, is a lesion certain to occur? 60
13. What kinds of lesions may appear in the near future,
following the infection? 61
14. If you are infected today, when will the first lesions
appear? 63
15. What happens after genital warts appear? 63
16. Are genital warts life-threatening? 63
17. If you have invisible (subclinical) lesions from HPV
on the cervix at this time, how can you know
about it? 63
18. Are you at direct risk from the invisible lesions
caused immediately after the infection? 64

How and when will HPV infection lead to cancer?

19. How can HPV drive your cells crazy? 64
20. What is the most frequent cancer in women
caused by HPV? 65
21. Which women are at a higher risk for cervical
cancer? 66
22. If a woman is infected with an oncogenic type
of HPV, will cervical cancer develop
immediately? 66
23. Why is cervical cancer considered preventable? 66
24. How can a woman know that she is not at risk? 67
25. In what organs, other than the cervix, can
high-risk types of HPV cause cancer? 67
26. How can doctors tell the difference between
premalignant lesions and simple infections? 68
27. What are LSIL and HSIL? 68

Genital types of HPV: How are they transmitted?

- 28. Where is the HPV that will infect you located? 69
- 29. How are genital types of HPV transmitted? 69

Oncogenic types of HPV: Sneaky invaders - Dangerous roommates. What can you do?

- 30. Can you know if you have been infected in the past by an oncogenic type of HPV or if you have an active infection in your cervical cells right now? 72
- 31. If an HPV infection is suppressed, does the risk continue to exist? 72
- 32. Does HPV ever leave your body? Do you have to keep having check-ups? 73
- 33. How can HPV appear again after many years? 73
- 34. Once with HPV – always with HPV? 73
- 35. How do you explain that many people are infected by HPV viruses but only a few have serious problems from them? 74
- 36. How can a woman know that she is not at risk? 75

What are your chances of becoming infected by genital types of HPV?

- 37. How frequent are HPV infections in the population? 75
- 38. Does the chance of infection by genital types of HPV increase depending on the number of sexual partners? 76
- 39. What is the probability of becoming infected by a new partner? 76
- 40. Can you know if your partner has an active infection at this time? 78

- 41. Are there high-risk sexual partners? 78
- 42. What is the possibility of a person becoming
infected by HPV over his or her lifetime? 78
- 43. Does the use of a condom prevent HPV infection? . . . 79

What can you do to protect your health?

- 44. What does prevention include? 80
- 45. What is primary prevention? 80
- 46. What is secondary prevention? 80

CHAPTER 2

Prevention of infection from specific types of HPV with vaccination

- 47. Which vaccines have been made available to date? . . . 84
- 48. How do vaccines against HPV work? 84
- 49. Do the vaccines prevent against all types of HPV? . . . 85
- 50. Which types of HPV do vaccines protect you from? . . 85
- 51. Which HPV-related diseases do the vaccines protect you from? 86
- 52. How was the effectiveness of the vaccines proven? . . . 87
- 53. What about head and neck cancers attributed to HPV? 88
- 54. Do the vaccines contain viruses? 89
- 55. Are vaccines a method of prevention or a method of treatment? 89
- 56. Should boys be vaccinated? 89
- 57. What is the ideal age for vaccination? 90
- 58. Is vaccination recommended even after the beginning of sexual activity? 91
- 59. How is the vaccine administered? Trends and most recent estimates 91
- 60. How safe are the vaccines? 92
- 61. What are the side effects of the vaccines? 92
- 62. Indications for the new Gardasil 9. 93
- 63. What do we know about the vaccine during pregnancy? 94
- 64. What happens if a woman becomes pregnant before completing the three doses? 94
- 65. After they are vaccinated, should women continue to have check-ups? 94
- 66. Is there a therapeutic vaccine for HPV? 94
- 67. Do vaccines lead to increased sexual activity in young people? 94
- 68. Is an HPV DNA test recommended before the vaccination? 95

CHAPTER 3

HPV and the female lower genital tract**Why are check-ups necessary?**

69. In what areas of the female genital organs does HPV cause cancer? 98
70. Why cervical cancer caused by HPV should not worry you if you have regular check-ups. 98
71. How long does it take for a precancerous lesion to form? 99
72. If there are any precancerous lesions, what would be the symptoms? 99
73. Are precancerous lesions visible during a gynecological examination? How are they discovered? 99
74. Why should lesions be found while they are still invisible to the naked eye? 100

HPV hides in the cervix...

75. In what type of cervical cells does HPV cause cancer? 101
76. How do we find precancerous lesions in the cervix? 103

CHAPTER 4

Pap test

PAP TEST

77. What is the Pap test? 107
78. How is the Pap test performed? 107
79. What do we mean by a negative Pap test? 107
80. Can a Pap test come out negative and miss
a lesion? 107
81. Is it possible to have more serious lesions than
what the Pap test showed? 108
82. What is the reliability of the Pap test? 108
83. How can the reliability of the Pap test be
improved? 109
84. What can the examination of the cervical cells
under the microscope show? 109
85. If the Pap test shows inflammation or atrophy,
what happens next? 110
86. If the Pap test shows abnormal cells, what is their
significance and what are the next steps to be
taken? 110
87. Is any preparation necessary before a Pap test? 113
88. At what age should women start getting Pap tests? . . 113
89. Up to what age should women keep getting
Pap tests? 114
90. Should women get Pap tests during pregnancy? 114
91. Must women who are not sexually active at present
have a Pap test? 115
92. Must women who have had a hysterectomy get
Pap tests? 115

CHAPTER 5

HPV test

93. What is the HPV test? 118
94. What is the logic behind the HPV test? 118
95. How is the HPV test performed? 118
96. Can an HPV test be performed together with
the Pap test? 118
97. At what age is it recommended that women get
an HPV test and why? 119
98. If the HPV test comes out positive, does this mean
that you have something serious? 120
99. What is the reliability of the HPV test and the double
test? 120
100. How should a woman prepare before an HPV test? . . 120
101. Are there HPV tests that show the type
of the virus? 120
102. Are there different types of HPV tests? 120
103. What are the possible results of the HPV test
and what do they mean? 121
104. In what cases in general are HPV tests
recommended? 121

CHAPTER 6

Colposcopy – Biopsy**Colposcopy**

- 105. What is a colposcope? 124
- 106. What is a colposcopy? 124
- 107. What is the colposcopy used for? 125
- 108. Is the colposcope used during surgery? 125
- 109. When is a colposcopy recommended? 126
- 110. How is the colposcopy performed? 126
- 111. Are biopsies always performed during
a colposcopy? 126
- 112. Are the colposcopy and biopsies painful? 127
- 113. Does the colposcopy have any risk? 127
- 114. Can you get a colposcopy during pregnancy? 127
- 115. Is any preparation necessary before a colposcopy? . . . 127
- 116. How reliable is a colposcopy? 128

Colposcopic biopsy

- 117. What exactly is a colposcopic biopsy and how is it
performed? 128
- 118. Why do we perform biopsies? 128
- 119. What is the reliability of a biopsy during
a colposcopy? 129
- 120. What does the doctor see under the microscope
when examining a biopsy? 130
- 121. What is the difference between a biopsy and
a Pap test? 130
- 122. What are the possible diagnoses after a cervical
biopsy? 130
- 123. How do we get from a check-up to a biopsy? 131

CHAPTER 7

Benign diseases caused by genital types of HPV**Subclinical lesions on the skin and mucous membranes**

124. What are subclinical lesions caused by HPV? 134
125. How frequent are subclinical lesions caused
by HPV? 134
126. What is the incidence of subclinical lesions caused
by HPV in the general population compared
to the incidence of genital warts? 134
127. Do subclinical lesions cause symptoms? How are
they discovered? 135
128. What types of HPV cause subclinical lesions? 135
129. What is the prognosis for subclinical lesions caused
by HPV? 135
130. If an infection by a cancer-causing type of HPV
is discovered, what is the next step? 136
131. What is the treatment for subclinical lesions? 136
132. Which subclinical lesions do we follow up
and why? 136

Genital warts**A) What are genital warts, what causes them and how will you recognize them?**

133. What are genital warts? 136
134. What causes genital warts? 136
135. What do genital warts look like? 137
136. Is it a common disease? 137
137. Where do warts appear in women? 137
138. Where do warts appear in men? 138
139. Is the appearance of warts in the mouth frequent? . . 139
140. What types of HPV cause genital warts? 139

B) Transmission of genital warts

141. How are genital warts transmitted? 139
142. If you have intercourse with an infected individual,
is infection inevitable? 140
143. How long after the infection do genital warts
appear? 141
144. How can you know if the individual you will have
intercourse with has the infection and that you
may become infected? 142
145. What are your chances of contracting genital warts
from a partner? 142
146. How can you find out when and who infected you? . . 143
147. If someone has common warts, can they infect you
with genital warts? 143
148. How can we explain genital warts in areas where
there is no friction during sexual intercourse? . . . 143
149. If a woman gets genital warts, must her partner
be examined? 143

C) Diagnosis of genital warts

150. What are the symptoms of genital warts? 144
151. How does a woman discover genital warts? 144
152. How can you know if you have genital warts
elsewhere? 144
153. What is the association between genital warts
and cancers caused by HPV? 144
154. What tests should you get if you develop genital
warts? 145
155. Can a woman with genital warts get a negative
HPV test? 145

D) Treatment of genital warts

156. Can genital warts and HPV infection be treated? . . . 145
157. What are the treatments for genital warts? 145

- 158. What medications or substances are used to treat genital warts? 146
- 159. How are genital warts destroyed? 148
- 160. When and how are warts removed? 150
- 161. Which is the best treatment for genital warts? 150
- 162. Do genital warts recur after treatment? 150
- 163. How is the recurrence of genital warts after treatment explained? 150
- 164. How can you increase the treatment's success rates? . 151

E) Prevention of genital warts

- 165. Is there a way to prevent genital warts? 152
- 166. How can you protect yourself? 152
- 167. What should you do to avoid infecting others? 152
- 168. Is there any point in getting vaccinated if you have ever had genital warts in the past? 153

Recurring respiratory papillomatosis

- 169. What is respiratory papillomatosis? 153
- 170. At what ages does it appear and how common is it? . 153
- 171. What is the cause of respiratory papillomatosis? 154
- 172. What are the symptoms? 154
- 173. How is it diagnosed? 155
- 174. How is it treated? 155
- 175. What is the prognosis? 155
- 176. Is there any prevention? 155

CHAPTER 8

Precancerous lesions on the cervix**From infection to precancerous lesions and cancer**

177. What is the cause of cervical cancer? 158
178. How can HPV cause cancer? 158
179. What do the terms LSIL and HSIL of the cervix
mean? 159
180. What are CIN1, CIN2, and CIN3? 162
181. What is the prognosis for CIN1, CIN2,
and CIN3/CIS? 162
182. Which terms are used internationally
for precancerous lesions on the cervix? 163

What does the diagnosis involve?

183. Are cervical precancerous lesions visible during
a gynecological examination? How are they
discovered? 165
184. Why should lesions be found when they are still
invisible to the naked eye examination? 165
185. What are the necessary tests and in what order
should they be performed? 166

Treatment of cervical precancerous lesions

186. What is the purpose of the treatment? 166
187. What treatments are there available? 167
188. How is the most appropriate method selected? 167
189. What are the criteria used to choose the correct
treatment for the lesions? 168
190. What happens if HSIL or CIN2/3 lesions
are discovered during pregnancy? 169

Description of procedures

191. What is the logic behind these procedures? 169
192. What should the patient do to prepare before
the procedure? 171

LEEP

193. What does it mean? 171
194. Does the LEEP procedure require anesthesia? 172
195. How is the procedure performed? 172
196. What are the complications and risks of a LEEP
procedure? 173
197. Post-operative instructions. 174
198. What are the future risks after a LEEP procedure? . . 175

COLD-KNIFE CONIZATION

199. What is it? 175
200. When is it performed? 176
201. How is the procedure performed? 176
202. What are the procedure's risks? 176

LASER CONIZATION

203. What is it and what are its advantages? 177
204. In which cases is it preferred? 178
205. What are its complications? 178

Procedures that destroy the transformation zone

LASER ABLATION OF THE TRANSFORMATION ZONE

206. What is it and how is it done? 179
207. What are the advantages and disadvantages
of the method? 179

CRYOTHERAPY

208. How is it done? 180
209. What are the advantages and disadvantages of the
method? 180

Post-operative follow-up and recurrences

210. Is follow-up necessary after the lesions are treated? . . 181
211. Will you be transmitting the HPV infection after
treatment? 182
212. If you get treatment and the HPV lesions are gone,
is there a risk of becoming reinfected by your
partner? 182

CHAPTER 9

Precancerous lesions caused by HPV in the vagina, vulva, and anus

Vaginal precancerous lesions (VaIN)

- 213. What are VaINs? 184
- 214. How are they diagnosed? 184
- 215. Which lesions require treatment? 185
- 216. How are high-grade lesions (HSIL/VaIN2, 3)
treated? 185
- 217. Can vaginal precancerous lesions appear in women
who have had their uterus removed? 185
- 218. What is the effect of smoking on VaIN lesions? 186

HPV-related precancerous lesions of the vulva (VIN)

- 219. What does VIN mean? 187
- 220. How are HPV-related VIN lesions classified? 187
- 221. Are HPV-related VIN lesions visible? 187
- 222. How are the lesions diagnosed? 188
- 223. How are HPV-related VIN lesions treated? 188
- 224. What does treatment entail and what are the
criteria? 188
- 225. Do the lesions recur after treatment? Is follow-up
necessary? 189

Precancerous lesions of the anal canal (AIN) and the perianal area (PaIN)

- 226. What are AIN lesions? 189
- 227. How are AIN lesions classified? 190
- 228. What is the prognosis for AIN lesions? 191
- 229. What are PaIN lesions and how can they be
classified? 191

- 230. Who is at risk for AIN and PaIN? 191
- 231. What preventive measures are recommended? 192
- 232. Are there symptoms from the AIN/PaIN lesions? . . . 192
- 233. How are the lesions diagnosed? 192
- 234. How are AIN/PaIN lesions treated? 193
- 235. Which AIN lesions require treatment? 193
- 236. How are high-grade lesions (HSIL/AIN2, 3)
treated? 193
- 237. Do AIN and PaIN lesions recur after treatment?
Is follow-up necessary? 194
- 238. How frequent are HSIL/AIN2, 3 lesions in the general
population? 194
- 239. Are women with high-grade lesions (HSIL)
in an organ at an increased risk for similar
lesions in other organs? 194

CHAPTER 10

Cancers caused by genital types of HPV

240. What is cancer? 196
241. In which organs do genital types of HPV
cause cancer? 197
242. Does HPV cause all the cancers in the above
organs? 197
243. Other than an oncogenic type of HPV, are there
other factors that lead to carcinogenesis? 198

Cervical cancer

244. What is the frequency of cervical cancer? 200
245. Which types of HPV cause cervical cancer more
frequently? 200
246. At what age does it usually affect women? 200
247. Which women are at a higher risk for cervical
cancer? 201
248. Does cervical cancer develop overnight? 201
249. What are the symptoms of cervical cancer? 201
250. How is a cervical cancer diagnosis made? 202
251. What is staging? 202
252. What is metastasis? 204
253. What are the treatments for cervical cancer? 205
254. What is the prognosis for invasive cervical
cancer? 205
255. How successful is the prevention of cervical
cancer? 205

HPV-related vaginal cancer

256. How common is vaginal cancer? 206
257. Is HPV the cause of vaginal cancer? 206

258. Which women are at a higher risk for vaginal cancer? 206
259. What about vaginal cancer prevention measures? 206
260. What is the treatment of vaginal cancer? 207

HPV-related vulvar cancer

261. How common is vulvar cancer? 208
262. What percentage of vulvar cancers is attributed to oncogenic types of HPV? 208
263. What factors increase the chance of HPV-related vulvar cancer? 208
264. What are the symptoms, what does it look like? 209
265. What does diagnosis entail? 209
266. What happens after the initial biopsy? 209
267. How is vulvar cancer treated? 209
268. Why should VIN lesions be found and treated? 210
269. Can HPV-related vulvar cancers be prevented? 210

Anal cancer

270. What is the cause of anal cancer? 211
271. How common is anal cancer? 211
272. At what age does anal cancer usually appear? 211
273. What are the signs and symptoms of anal cancer? 211
274. What is the connection between anal warts and anal cancer? 212
275. What tests are recommended for the prevention of anal cancer? 213
276. Can anal cancer be prevented? 213

Head and neck cancer attributed to HPV

277. What are the factors for carcinogenesis in the head and neck? 214

278. Where do HPV-related cancers usually appear? 214
279. How is HPV transmitted to the oropharynx? 214
280. How common are oropharyngeal HPV infections? . . . 215
281. Does HPV cause carcinogenesis in the oropharynx
immediately after the infection? 215
282. At what ages does oropharyngeal cancer appear? . . . 216
283. Should a couple's sex life change if an oropharyngeal
HPV lesion is discovered? 216
284. What prevention measures can be taken
for oropharyngeal cancer? 216
285. Is there any test that finds lesions? 216
286. How can you find out if you should be concerned
about any symptom you are experiencing? 217

CHAPTER 11

Men and HPV (everything your partner would like to know)

Transmission of the infection and effects on men

287. How common are infections from genital types
of HPV in men? 220
288. How are genital types of HPV transmitted in men? . 220
289. What do genital types of HPV cause in men? 220
290. Which factors affect the risk of a man getting
infected by HPV? 224

Diagnosis and treatment

291. What are the symptoms of a man recently infected
with HPV? 225
292. How are genital warts diagnosed? 225
293. How are subclinical infections and precancerous
lesions diagnosed? 225
294. Can a man be tested to find out if he has been
infected with HPV in the past? 226
295. What treatment should men get? 227

Prevention

296. Is there any preventive test for penile cancer in men? . 227
297. Is there any preventive test for anal cancer in men? . 228
298. Can an HPV infection be prevented in men? 229

Answers to the questions of the male partner

299. Should the partner of a woman who was found
with HPV infection be checked? 230
300. My partner was diagnosed with an HPV infection.
What are the risks for my health? 230

CHAPTER 12

You and HPV – You don't need to worry if...**The effects from genital types of HPV in you
and your children**

301. What are the general problems in the population? . . . 234
302. What are the psychological consequences when
a woman finds out she has been infected? 234
303. What questions do couples have after a positive
diagnosis of an HPV infection? What should
the doctor do? 235

**Don't feel bad – Overcome your fears –
Be informed – Knowledge is power!**

304. Is there any reason to feel bad because your
doctor told you that you have been infected
with HPV? 235
305. What basic knowledge must every woman have? . . . 236
306. What should you do to protect your children? 238
307. You were diagnosed with an HPV infection.
Is there any risk of infecting your children? 238
308. How should you manage an HPV infection together
with your partner? 238

Boost your defense mechanisms with a healthy lifestyle

309. What is the role of your defense mechanisms
in carcinogenesis? 240
310. What can you do to improve your immune
system? 241
311. Why is it good not to smoke? 241

<i>Afterword</i>	243
<i>Bibliography</i>	247
<i>Glossary</i>	255
<i>Index</i>	261

WARNING!

This publication and the information contained in this book under no circumstances can – or intend to – serve as a substitute for medical services or provide guidance for diagnosis or treatment.

The intention of this book is exclusively informational, and in no case can it take the place of your physician's advice.

The book contains general information based on current scientific data. The case of each patient, however, is unique, and only your doctor that will examine you, and knows your history, can guide you toward the solution for your problem.
